DETAILED ACTION

Applicants' amendment filed 10-15-02 has been entered. Claims 4, 5, 9, 11, 13 and 14 have been amended. Claims 1, 2, 7, 8, 10 and 15-24 have been canceled. Claims 3-6, 9 and 11-14 are pending and under consideration.

As discussed in the preceding Official action mailed 4-10-02 (Paper No. 8), this application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Appropriate response to "Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures" is required.

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants' amendment filed 10-15-02 necessitates this new ground of rejection.

Art Unit: 1633

Claim 6 depends on canceled claim 1 or 2 and renders the claim indefinite. It is unclear what is intended to be claimed in claim 6.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

> The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 3-6 and 11-14 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention and is repeated for the reasons set forth in the preceding Official action mailed 4-10-02 (Paper No. 8). Applicant's arguments filed 10-15-02 have been fully considered but they are not persuasive.

Applicants amended claim 9 to read on the V-domain of soluble receptor for advanced glycation endproduct (sRAGE) and argue that the rejection has been obviated (amendment, p. 11). This is not found persuasive because of the reasons of record. The scope of the inhibitor of RAGE in claims 3-6 and 11-14 remain unchanged and, therefore, claims 3-6 and 11-14 remain rejected under 35 U.S.C. 112 first paragraph written description rejection for the reasons of record.

Art Unit: 1633

5. Claims 3-6, 9 and 11-14 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for reduction of smooth muscle proliferation and migration in carotid artery by treating Fatty Zucker rat with soluble RAGE (sRAGE) via intraperitoneal injection, does not reasonably provide enablement for any method for preventing exaggerated restenosis in a diabetic subject by administering to said subject any polypeptide inhibitor of RAGE *in vivo*. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims and is repeated for the reasons set forth in the preceding Official action mailed 4-10-02 (Paper No. 8). Applicant's arguments filed 10-15-02 have been fully considered but they are not persuasive.

Applicants amended claim 9 to read on the V-domain of soluble receptor for advanced glycation endproduct (sRAGE) and amended claims 4, 5, 9, 11, 13 and 14 to read on preventing exaggerated restenosis in a diabetic subject by using inhibitor of RAGE, and argue that the rejection has been obviated (amendment, p. 2, 3, 11). This is not found persuasive because of the reasons of record. The scope of the inhibitor of RAGE in claims 3-6 and 11-14 remain unchanged and, further, the specification only discloses reduction of smooth muscle proliferation and migration in carotid artery by treating Fatty Zucker rat with soluble RAGE (sRAGE). The specification fails to provide adequate guidance and evidence that any inhibitor of RAGE, including sRAGE or V-domain of sRAGE, can **prevent** exaggerated restenosis in a diabetic

Application/Control Number: 09/687,528

Art Unit: 1633

subject. Therefore, claims 3-6, 9 and 11-14 remain rejected under 35 U.S.C. 112 first paragraph

enablement rejection for the reasons of record.

Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter

which was not described in the specification in such a way as to reasonably convey to one skilled

in the relevant art that the inventor(s), at the time the application was filed, had possession of the

claimed invention. Applicants' amendment filed 10-15-02 necessitates this new ground of

rejection.

6.

The phrase "V-domain of soluble receptor for advanced glycation endproduct (sRAGE)"

in claim 9 is considered new matter. The amendment filed 10-15-02 indicates that page 19, lines

27-30 and page 18, SEQ ID No. 5 provide support for the amended claim 9. However, none of

those pages mention "V-domain" of sRAGE and the specification fails to provide sufficient

disclosure for "V-domain" of sRAGE. Thus, the phrase "V-domain of soluble receptor for

advanced glycation endproduct (sRAGE)" in claim 9 is considered new matter.

Conclusion

No claim is allowed.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this

Office action. Accordingly, THIS ACTION IS MADE FINAL. See MEP. § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/687,528 Page 6

Art Unit: 1633

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shin-Lin Chen whose telephone number is (703) 305-1678. The examiner can normally be reached on Monday to Friday from 9 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Reynolds can be reached on (703) 305-4051. The fax phone number for this group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist, whose telephone number is (703) 308-0196.
